

Certificate of participation

Sham Moodley

took part in the digital learning course

Lightning and surge protection basics for the e-mobility charging infrastructure

The effects of lightning and surges on the charging infrastructure and connected vehicles were demonstrated. Planning a protection concept and which standards and regulations have to be observed was explained. Protective measures for safe and trouble-free operation were explained and their practical implementation presented on the basis of the lightning protection zone concept.

The digital learning course was successfully completed with a knowledge test.
